The Interest on these Notes for the Years 1 to 4 is a 2.50 per cent Fixed Rate.

The interest on these Notes for the Years 5 to 8 is linked to the development of the difference between the 10 year EUR Constant Maturity Swap (CMS) Rate (“**EUR CMS 10 Yr**”) and the 2 year EUR Constant Maturity Swap (CMS) Rate (“**EUR CMS 2 Yr**”). Both rates give an indication of the rates at which banks are prepared to lend to each other in the interbank market for the relevant period. Generally speaking, the 10 year rate is supposed to be higher than the 2 year rate because of the longer time horizon and the higher risk associated therewith. The interest on the Notes will depend on, *inter alia*, the difference between the two rates. The higher the difference observed between the two rates (i.e. the 10 year rate minus the 2 year rate is *greater*), the higher the interest on the Notes will be. From the year 5, the Interest Rate applicable for each Interest Period, such rate being determined in accordance with the formula specified under item 17 of the Part A of the Final Terms, will be of minimum 0 per cent per annum and of maximum 5 per cent per annum.

Any historical information regarding rates does not necessarily constitute an indication as to the future performance of the relevant rate.

“**EUR CMS 2Y**” means EUR 2 YR Swap Rate (quoted on a annually, 30/360 day basis) versus 6 month Euribor (quoted on a semi-annually, Act/360 basis) as published on Reuters Page ISDAFIX2, at 11:00 AM Frankfurt Time, fixed 2 TARGET Settlement Days prior to the end of annual Interest Period

Their analysts consider that uncertainties remain regarding the strength of the recovery, particularly in light of the U.S. Federal Reserve's announcement in December 2013 that it would gradually reduce ("taper") its stimulus program, and in the Euro-zone, where a risk of deflation exists.</p> <p>Within the Euro-zone, sovereign credit spreads continued to decrease in 2013 following the decrease recorded in 2012 from the previous historically high levels. Section D– Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	<p>In purchasing Notes, investors assume the risk that the relevant Issuer and/or, if BP2F is the Issuer, the Guarantor, may become insolvent or otherwise be unable to make all payments due in respect of the Notes. In the event of the insolvency of BNPPF or BP2F, as applicable or if it is otherwise unable or unwilling to repay the Notes when repayment falls due, an investor may lose all or part of his investment in the Notes.</p> <p>There is a wide range of factors which individually or together could result in the relevant Issuer and the Guarantor, where applicable, becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, the Issuers and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuer's and/or the Guarantor's control. The Issuers and/or the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p>
		<p><i>BNPPF/the Guarantor:</i></p> <p>The following is a summary of some of the investment considerations relating to the business of BNPPF:</p> <ul style="list-style-type: none"> (a) Difficult market and economic conditions including, without limitation, concerns regarding the ability of certain countries in the eurozone to refinance their debt obligations, could in the future have a material adverse effect on the operating environment for financial institutions and hence on BNPPF's financial condition, results of operations and cost of risk. (b) Legislative action and regulatory measures taken in response to the global financial crisis may materially impact BNPPF and the financial and economic environment in which it operates. (c) BNPPF's access to and cost of funding could be adversely affected by a further deterioration of the euro zone sovereign debt crisis, worsening economic conditions, a ratings downgrade or

other factors.

- (d) The soundness and conduct of other financial institutions and market participants could adversely affect BNPPF.
- (e) BNPPF may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
- (f) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPPF's results of operations and financial condition.
- (g) BNPPF may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.
- (h) BNPPF's hedging strategies may not prevent losses.
- (i) Significant interest rate changes could adversely affect BNPPF's net banking income or profitability.
- (j) Protracted market declines can reduce liquidity in the markets making it harder to sell assets and possibly leading to material losses.
- (k) Notwithstanding BNPPF's risk management policies, procedures and methods it could still be BNPPF exposed to unidentified or unanticipated risks, which could lead to material losses.
- (l) While each of BNPPF's businesses manages its operational risks, these risks remain an inherent part of all of the BNPPF's businesses.
- (m) BNPPF has significant counterparty risk exposure and exposure to systemic risks.
- (n) BNPPF's competitive position could be harmed if its reputation is damaged.
- (o) An interruption in or a breach of BNPPF's information systems may result in lost business and other losses.
- (p) Litigation or other proceedings or actions may adversely affect BNPPF's business, financial condition and results of operations.

		<ul style="list-style-type: none"> (q) Uncertainty linked to fair value accounting and use of estimates. (r) Risks and uncertainties connected to the integration and optimisation of the operations of BNPPF following its acquisition by BNP Paribas. (s) A deterioration of the credit rating of BNP Paribas of its debt quality could adversely affect BNPPF. (t) Unforeseen external events can interrupt BNPPF's operations and cause substantial losses and additional costs. (u) BNPPF is subject to extensive and evolving regulatory regimes in the countries and regions in which it operates. (v) Intense competition in the financial services industry could adversely affect BNPPF revenues and profitability.
		<p>BP2F:</p> <p>The following is a summary of some of the additional investment considerations relating to the business of BP2F:</p> <ul style="list-style-type: none"> (a) The primary credit protection for Notes issued by BP2F will derive from the guarantees given by BNPPF. (b) BP2F's ability to make payments under the Notes may depend on the operating performance of those companies to which the proceeds of the Notes are lent. (c) BP2F's ability to perform its obligations in respect of the structured return on structured securities may depend on the ability of its hedging counterparties to meet their obligations under any hedge. (d) The financial condition of the operating companies to which the proceeds of the Notes are lent may deteriorate and this may affect BP2F's ability to make payments under the Notes which it issues.

		<p>(e) During deteriorating or challenging economic conditions BP2F may find it difficult to raise further finance.</p> <p>(f) Transfer pricing tax rules in Luxembourg generate additional costs, which may vary from time to time.</p>
<p>D.3</p>	<p>Key risks regarding the Notes</p>	<p>There are certain factors which are material for the purposes of assessing the market risks associated with Notes issued under the Programme, including that:</p> <p>The trading price of the Notes is affected by a number of factors including, but not limited to, the price of the relevant underlying reference(s), time to expiration or redemption and volatility and such factors mean that the trading price of the Notes may be below the Final Redemption Amount.</p> <p>The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Notes, or early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Notes.</p> <p>Expenses and taxation may be payable in respect of the Notes.</p> <p>The Global Notes are held by or on behalf of the clearing systems, therefore investors will have to rely on their procedures for transfer, payment and communication with the Issuer and the Guarantor.</p> <p>The Issuer and the Guarantor will discharge their payment obligations under the Notes by making payments to the relevant common depositary for the relevant clearing system for distribution to their account holders. The Issuer and the Guarantor will have no responsibility for the proper performance by the clearing systems relating to payments made in respect of, the Notes within any relevant clearing system.</p> <p>The Notes may be redeemed in the case of illegality or impracticability and such cancellation or redemption may result in an investor not realising a return on an investment in the Notes.</p> <p>The meetings of Holders provisions permit defined majorities to bind all Holders.</p>

		<p>Any judicial decision or change to an administrative practice or change to English law after the date of the Base Prospectus could materially adversely impact the value of any Notes affected by it.</p> <p>A reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Notes.</p> <p>Certain conflicts of interest may arise (see Element E.4 below).</p> <p>The only means through which a Holder can realise value from the Notes prior to its Maturity Date is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Notes (which could mean that an investor has to exercise or wait until redemption of the Notes to realise a greater value than its trading value) and the conditions of the Notes contain provisions which may permit their modification without the consent of all investors.</p>
D.6	Risk warning	Investors may lose all or part of their investment in the Notes as a result of the terms and conditions of the Notes.
